Art Unit: 1765

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a process, classified in class 438, subclass 689.
- II. Claims 17-20, drawn to a product, classified in class 257, subclass 666.

 The inventions are distinct, each from the other because of the following reasons:
- 2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another materially different process such as drilling or punching instead of etching.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. During a telephone conversation with Christopher Bennett on 4/18/05 a provisional election was made **without** traverse to prosecute the invention of Group I, claims 1-16. Affirmation of this election must be made by applicant in replying to this Office action. Claims 17-20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 1765

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 7. Claims 1, is rejected under 35 U.S.C. 102(e) as being anticipated by Kwan et al (6,872,661).

Kwan et al disclose a process for fabricating a leadless plastic chip carrier, wherein the process includes the steps of:

- Etching (partially) a first surface of a lead frame strip in order to define a die attach pad, contact pads and power/ground ring resemble with the claimed bond fingers intermediate said die attach pads and said contact pads (see claim 1);
- Forming metal strip or layers on the first surface of the frame (col.5, lines 8-25 and claim 1);

Art Unit: 1765

Mounting a semiconductor die to said die attach pad;

- Wire bonding said semiconductor die;
- Encapsulating said lead frame strip in a bolding material;
- Etching (selective) back a second surface for exposing contact pads and the die attach pads by removing the metal strip or layers (see figures 2K and 3K;
- Singulating said leadless plastic chip carrier from said lead frame strip (claims 1-7).

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 2-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kwan et al (6,872,661) as applied to claim 1 above, and further in view of McLellan et al (6,498,099).

Kwan et al discussed above in the paragraph 7 but fail to teach depositing etchresist metal on the second surface prior to selective etching and prior to laminating.

However, McLellan et al teach a process of fabrication of lead frame plastic chip carrier including the step of plating or depositing the lead frame strip with silver or nickel/palladium, which resemble the claimed etch-resist metal in order to facilitate wire bonding (col.3, lines 18-23).

Art Unit: 1765

Therefore, it would have been obvious to one of ordinary skilled in the art at the time of claimed invention to combine McLellan et al's teaching into Kwan et al's process for facilitating the wire bonding between the chip and the contact pads as taught by McLellan et al.

Conclusion

10. The prior art cited in PTO-892 made of record and not relied upon is considered pertinent to applicant's disclosure. Gang (US 2002/0041019) teaches the introduction of removable film of metal or polymer attached to the first surface of the lead frame including the conductive lands.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shamim Ahmed whose telephone number is (571) 272-1457. The examiner can normally be reached on M-Thu (7:00-5:30) Every Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine G. Norton can be reached on (571) 272-1465. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
